

Tennessee Department of Health Presents:

A Statewide Newborn Screening Reporting Process

What is it?

A statewide initiative to provide hospitals with a portal and tools to:

- Automate specimen submission process
- Improve specimen transit times
- Reduce manual data entry and missing information

How will it benefit my hospital?

- Portal and tools provided at NO COST to hospital
- Printable patient work lists
- Minimal data entry with use of demographic feed
- Automatic electronic lab order sent to state
- Shipment manifest and specimen tracking details
- Inventory management

What are the next steps?

You will be provided at NO COST the following:

- Four (4) products
 - NANI, Telepathy NBS, Electronic Lab Order, Track-Kit
- Implementation assistance
- Performance monitoring
- OZ Systems representative will call you
- OZ Systems will support your full implementation
