

## ***Percent of National Births and Number of States Screening for All Disorders As of May 8, 2015***

***The purpose of this document is to report on 1) the number of states screening for the 32 disorders listed on the RUSP, and 2) the percent of all births in the United States screening for the 32 disorders listed on the RUSP. The number of programs screening includes all 50 states and 3 territories including: 1) Washington D.C., 2) Puerto Rico, and 3) Guam. Percents were calculated as the sum of the birth numbers in states/territories universally screening for a disorder divided by total national annual births. Pompe is not currently listed in the table because percent of population screened currently = 0%.***

| <b>Condition</b>  | <b>Number of Programs Screening<br/>n=53</b> | <b>Percent of National Births Screened</b> |
|---|--|--|
| 3-Hydroxy-3-methylglutaric aciduria - HMG                       | 52   | 100%                                       |
| 3-Methylcrotonyl-CoA carboxylase deficiency - 3-MCC             | 50   | 96%  |
| Argininosuccinic aciduria - ASA                                 | 52   | 100%                                       |
| Beta-Ketothiolase deficiency - BKT                              | 52   | 100%                                       |
| Biotinidase deficiency - BIOT                                   | 52   | 100%                                       |
| Carnitine uptake defect/carnitine transport defect - CUD        | 52   | 100%                                       |
| Citrullinemia, type I - CIT                                     | 52   | 100%                                       |
| Classic galactosemia - GALT                                     | 52   | 100%                                       |
| Classic phenylketonuria - PKU                                   | 52   | 100%                                       |
| Congenital adrenal hyperplasia - CAH                            | 52   | 100%                                       |
| Congenital hypothyroidism - CH                                  | 52   | 100%                                       |
| Critical congenital heart disease - CCHD                        | 39   | 84%  |
| Cystic fibrosis - CF  | 51   | 99%  |
| Glutaric acidemia type I - GA1                                  | 52   | 100%                                       |
| Hearing loss - HEAR   | 51   | 99%  |
| Holocarboxylase synthase deficiency - MCD                       | 51   | 98%  |
| Homocystinuria - HCY  | 52   | 100%                                       |
| Isovaleric acidemia - IVA                                       | 52   | 100%                                       |
| Long-chain L-3 hydroxyacyl-CoA dehydrogenase deficiency - LCHAD | 52   | 100%                                       |
| Maple syrup urine disease - MSUD                                | 52   | 100%                                       |

***Percent of National Births  
and Number of States Screening for All Disorders  
As of May 8, 2015***
