

NEW TOOLKIT COMING IN 2026!

Metachromatic Leukodystrophy

Newborn Screening Implementation Resources and Tools

The NewSTEPs New Disorders Subcommittee is developing the Metachromatic Leukodystrophy (MLD) Toolkit to aid state and territorial newborn screening (NBS) programs in communication and education of key partners during the implementation of this new disorder.

The toolkit includes an overview of MLD and the NBS process, screening preparation and support, educational tools for MLD and more.

The intended audiences for this toolkit are state and territorial NBS programs who can distribute it amongst key partners such as specialists, advocacy groups, legislators and government agencies seeking information on NBS disorder implementation.
